

ANSWER SHEET

- Q1 Total Trips: 300 rows
- Q2 Top 5 Longest Trips: 250, 225, 126, 98, 151. The longest is trip 250 in Lagos (35.9 km, ₦6,240).
- Q3 Trips by City: 12 city names appear instead of 6
- Q4a Duplicates Trips: trips 82 and 299, and trips 253 and 300
- Q4b 9 completed trips have no fare
- Q5 After cleaning: 6 cities, 298 rows (300 minus 2 duplicates). Missing fares were left alone.
- Q6 Revenue by City: Lagos ₦218,890 (93 trips, avg 2,405.38); Accra ₦92,640; Abuja ₦88,720; Port Harcourt ₦71,240; Nairobi ₦58,960; Kampala ₦38,020
- Q7 Best month: 2025-12, 31 trips, ₦66,980
- Q8 Economy ₦262,550 (121 trips); Comfort ₦239,050 (76); Bike ₦66,870 (51)
- Q9 (bonus) Customer who Never Booked: Bisi Ogunleye, Wanjiru Kamau, Akinyi Ouma, Nakato Namutebi
- Q10 (bonus) Top 3 Customers by Spend: Chioma Nwosu ₦38,950 (21 trips); Tunde Bakare ₦37,610 (13); Zainab Garba ₦35,380 (15)

MESSAGE TO THE MANAGER

ZoomRide should invest in Lagos, which earned ₦218,890 from 93 completed trips, more than double Accra, the next best city at ₦92,640. Accra has the highest average fare at ₦2,807, so it is a good second choice. One data problem was that city names were spelled in different ways (like PH, Nairobobi and Kampla), which would have split one city's trips and revenue across several rows and hidden the true totals. Another problem was that 2 trips were saved twice, which would have counted the same money two times and made revenue too high. Before a big decision, I would like to know each city's costs and driver availability, and why 9 completed trips have no fare, because revenue alone does not show profit.
